

As a follow up to the last years "Induction Program - VLSI", M/s Reliable Technosystems India Pvt Ltd, Hyderabad is kicking in a new batch of employment oriented VLSI and Embedded design course.

We plan to cultivate and nurture trained VLSI pool of candidates for the industry to work on latest state of the art technology. To accomplish this, the course is structured to go through 4 step process.

- A. Selection process**
- B. Training Program**
- C. Internship/On-job program**
- D. Employment or Deployment**

A Technical written test will be conducted during mid-April 2015, at our campus Gachibowli, Hyderabad. Candidates will be finalized for the course after a short interview on the same day.

Training will be for **3** months covering Design & verification of VLSI & Embedded product design aspects

After completion of initial **3 months** full time course, we will be providing **6 months** of internship program where the candidate will work on R&D/Live projects. During this period a stipend of Rs 5,000/- per month will be paid

We plan to absorb top few into M/s Reliable Technosystems (I) Pvt Ltd & its associate IP organizations. Reliable is into staff augmentation & would like to actively pursue this with many. We are also open to support on direct employment for candidates

We will be conducting two counselling sessions to provide more clarity & clarify the candidates willing to join this program. This course has a fee & the details will be provided for interested/willing candidates.
